CLEAN VERSION OF THE CLAIMS

- 31. A method for treating post-operative incisional wound pain comprising administering a therapeutically effective amount of a botulinum toxin to an afflicted area of a patient, thereby alleviating the post-operative incisional wound pain.
 - 32. The method of claim 31, wherein the botulinum toxin is selected from the group consisting of the botulinum toxins types A, B, C, D, E, F and G.
 - 33. The method of claim 31, wherein the botulinum toxin is botulinum toxin type A.
 - 34. The method of claim 31, wherein the botulinum toxin is administered before, during or immediately after a surgery.
 - 35. The method of claim 34, wherein the botulinum toxin is administered up to about 10 days before the surgery.
 - 36. The method of claim 31, wherein the post-operative wound pain is not associated with a muscle disorder.
 - 37. The method of claim 31, wherein the post-operative incisional wound pain is alleviated for about 2 to 6 months.
 - 38. A method for treating post-operative incisional wound pain comprising administering a therapeutically effective amount of a botulinum toxin type A to an afflicted area of a patient before, during, or immediately after a surgery, thereby alleviating the post-operative incisional wound pain for about 2-6 months.
